

## GIGANTIC HORDEOLUM

Case History: L.J. Female, Age 7, Very large stye on upper lid of right eye. Ripe but very painful and would not drain.

Description: Pyknic

Visual Condition: Did not take down or record

Syntonizations: Two. First day, Mu Delta for 15" followed With Alpha for 5"; second day Mu Upsilon For 15". Expected it to break and drain with the first syntonizations; it did.

After the Mu Upsilon syntonization on the second day the redness and soreness was all gone. Leaving lid most normal.

Submitted to the Oregon Academy of Syntonic Optometry, Feb. 21, 1937
