

EXOPHORIA -- Fatigue at Near Point

CASE HISTORY; Miss J. C., Age 21; College Student

Complaint: Excessive fatigue at studies. Had to go to bed every afternoon after classes on account of physical exhaustion. Found it increasingly difficult to concentrate at near point and absorb from printed page. Wearing at near point only OU plus 1.50. With this Rx, No. 3 - 3 Exo, No. 13A - 14 Exo. Examination indicated OD +2.00-.75 x 180; OS +2.75-.75 x 180. With this Rx No.8 - 2 Exo, No. 13B - 12 Exo.

DESCRIPTION: Asthenic, medium height, normal weight.

VISUAL CONDITION: Acuity Normal

SYNTONIZATIONS: N/L CO / L & 1-1

Patient was dismissed after eleven such syntonizations were given.

RESULTS: No more excessive fatigue. More interest in life. Can easily keep up with her college work. No.13B- after last syntonization, 9 Exo. Wears new Rx. as given under "History" practically at all times.

Submitted to the Oregon Academy of Syntonic Optometry on March 15, 1936.
