

THE SECRETARY SPEAKS

The 1936 Assembly at Dayton Ohio, is now history. It will be remembered mostly perhaps because of the fact that finally, plans for the creation of the permanent College home were approved and instructions given to let the contracts.

So by the time another Assembly is held, the College should be up and in use, and perhaps the 1937 Assembly will be held in it. Present plans at least call for its dedication during that annual affair.

Another feature of the 1936 Assembly was the number of most practical papers. These will come to members in good standing in the Syntonograms, but those who attended have the advantage of already putting into practice the things they heard.

Fellowships were awarded to Dr. O. J. Melvin, Omaha; Dr. Wm. Stieren, Jr., Pittsburg; Dr. R. E. Simpson, President; Dr. E. J. Moynier, Los Angeles; Dr. R. F. Pray, Jr. Beaumont; Dr. D. J. Mayer, Riverside, for the completion of their research problems and presentation of satisfactory reports.

It might be well to remind you at this point that a year is not too long a time to work on a research problem. Those problems are assigned by Spitler and can gain you credit toward Syntonic degrees as well as Fellowships. If you are interested, now is the time to get started – not a few days before the next assembly.

Dr. J. O. Nugent was elected President of the College after being re-elected Trustee for another term. A new trustee, Dr. Eugene B. Brown of Dayton, was elected and he was also named as Vice-President by the Board of Trustees.
