

## AMBLYOPIA

CASR HISTORY: Female, age 10. Has been Amblyopic in OD over 5 years that I know of. OS practically Normal. +.50.

DESCRIPTION: Blond hair, fair complexion. Unusually small and light in weight.

VISUAL FUNCTION: V. A. OD light vision; OS 20/20.

SYNTONIZATIONS: L  $\alpha$   $\omega$ , ten treatments; L  $\mu$   $\theta$  1-1 19 treatments.

Results: No definite improvement in vision, but better perception of form with OD and more comfort.

Submitted to the Oregon Academy of Syntonic Optometry, August 17, 1936.
