

CHRONIC SINUSITIS

CASE HISTORY: Mr. P. R. Age 25 Single
Complaint: Severe headaches, worse on right side.

DESCRIPTION: S/A/ type. Medium height and light weight;
Right frontal and malar portion of face more full.

VISUAL CONDITION: 20/30+ each and 20/20 OU; R Hypo 1 and Exo 2;
Rx. +.50 OU. Did not give correction for he is a
WPA and works out in the rain.

SYNTONIZATION: N/L μ u and μ δ one to two making a total
of 18 to date, and given irregularly since
November 27th.

RESULTS: Got great relief from headaches right from the start;
after the second week a copious discharge
began which is now beginning to quit.

Submitted to the Oregon Academy of Syntonic Optometry, Feb. 27, 1938
