

## Chalazion

- CASE HISTORY:** Mrs. J. L. W.; female; age 45; House wife; asthenic  
Been wearing Rx R. + 50 + 50 x75  
L. +100 +25 x 106 for two years comfortably.  
Has ben in poor health for several years.  
Diagnosed as gall bladder trouble and female difficulty  
which caused nervousness and stomach trouble.
- VISUAL CONDITION:** Having difficulty sewing and reading;  
Made new Rx : R. +1.00  
L. +1.25 Add +.75  
One month later changed Rx to R. +1.50  
L. +1.75 Add same  
Chalazion developed also other complaints such  
as scratching and burning after reading.  
Color fields small but fairly regular.
- SYTONIZATIONS:**  $\alpha\omega$  for seven minutes;  $\mu\nu$  for seven minutes  
over period of three months. Chalazion got  
smaller but still scratched and got larger after  
close work.  
Finally advised operation which was done two weeks  
ago and patient happy.
