

DISCOMFORT IN READING WITH GLASSES
INABILITY TO READ WITHOUT

Case History: Male age 49, cook married.
He had come to the place where he could
Not read without glasses. His first
Glasses were unsatisfactory.

Description: Syntonic, leaning toward pyknic.
Tired looking. Slow and deliberate. Full
face, squinting eyes.

Visual Condition: Vision 20/20 naked. With +1.25 sph. OU
Vision 20/20.
No 14 A +3.75 15 a 15 exo
Gave +1.25 sph for reading. Would not
wear glasses at work. These were inadequate.
Increasing Rx to +2.00 gave better reading
vision but more discomfort.
He finally accepted my advice for treatments
and in conjunction with base out exercises
on a Keystone, gave syntonics.

Syntonizations: Gave eleven syntonization, one every other
day. (approximately). Rx L μ and L μ π

He finally accepted +3.00 sph for reading
Showing 5 exo. Case dismissed for present.
Expect to get a distant correction on him
Before log.
