

Difficulty when Reading "C" Type

CASE HISTORY: Mr. C.M.; age 30; Truck Driver

Syntonics asthenia, complaint: having difficulty when reading, attending picture shows; car lights bothered at night.

VISUAL CONDITION: Right eye 20/20; left eye 20/15. Never worn correction. C type case. Rx OD +37; OS +50. Stereopsis 40%. Correction given.

SYNTONIZATIONS: Twelve syntonizations L/  $\alpha$   $\omega$  for twelve minutes.

RESULTS: Stereopsis improved to 90% in seventeen days. Headaches disappeared after reading, seeing picture shows: car lights do not interfere with driving.

Submitted to the Oregon Academy of Syntonics Optometry mar 28, 1938.
