

FOLLOW-UP-REPORT ON CATARACT CASE AFTER SIX
MONTHS

See page 6

CASE HISTORY: E. P. D., Female, Age 65, Married.
Senile Cataracts. Received Treatments
last January and case report turned
in on February 6, 1936.

DESCRIPTION: S/P

SYNTONIZATIONS: Local μ U once monthly, as patient does not live
here in town. No response in Right eye, but
the Left is gradually clearing away the nuclear
spot which is quite small now. Visual acuity
in the Left is 20/30+.

Submitted to the Oregon Academy of Syntonic Optometry, August 17, 1936.
