

## HYPERPHORIA

### CASE HISTORY:

Mr. C. A.; age 63  
Syntonic type

Complaint: Inability to read; never worn glasses  
except reading lens.

Former Rx: +2.00 O.U.

New Rx: R. +2.00

L. +.75 +1.25 x 45 Reading only.

Patient showed 2 prism degrees of right  
hyperphoria

### SYNTONIZATIONS:

Six syntonizations of L/  $\mu$  v

### RESULTS:

Hyperphoria disappeared: reading comfortable;  
even vision at distance improved and patient  
was less nervous.

Submitted to the Oregon Academy of Syntonic Optometry Mar. 28, 1938
