

LID INVOLVEMNET – with granulations

CASE HISTORY: Mrs. B. M. Age 27 Mother – housewife

Complaint: Lids of both eyes swell badly and secrete matter. Lashes fall out and eyes very uncomfortable. This happens about each three or four months and will last until corrected with severe medication by physician. Vision not clear even with present glasses.

DESCRIPTION: Asthenic-Syntoniac. Normal height and weight.

VISUAL CONDITION: N.V. R 20/40 L 20/68
Wearing - .87-.87 x 70 Right Vision 20/25
 1.00-1.00 x 150 Left 20/25
New Rx. -1.00 +.50 x 138 Vision 20/20
 -1.00 + 1.00 x 75 20/20

SYNTONIZATION: Six applications of $\mu\upsilon$ (Mu Upsilon)

RESULTS: Condition entirely relieved – for the first time in her life without medicine. This has remained entirely clear for more than three months.

Submitted to the Oregon Academy of Syntoniac Optometry on June 25, 1936.
