

MILKY CATARACT

CASE HISTORY: J.P. Female, age 68, Single, Blurry Eye Sight.  
Came to me on 8?16/28 wearing +2.00 OU 20/30.  
I gave her +2.50 with add +2.50 which gave her  
20/30+ and was more satisfactory than the +2.00.

DESCRIPTION: Asthenic.  
Dark Complexion. Manish appearance, about 5 ft.  
6 in. and weighing 160 lbs., large nose with  
high bridge, medium P.D.

VISUAL CONDITION: 20/70 each and 20/40 OU. This being on 9/26/36

Rx. R +1.50-.50x30 20/30-  
20/30 OU  
L +1.00 -.50x150 20/30-

SYNTONIZATIONS: Six syntonizations of  $\mu$  v without the collimating  
Lens given on alternating days for 15 minutes each  
Has cleared up her Eye Sight greatly. The left on  
10/7/36 had changed to +1.25-.50x150 giving her 20/30+.  
On the 9<sup>th</sup> when she took her last syntonization, her  
eye sight was 20/20. She says she now sees the best  
that she has in years.

Submitted to the Oregon Academy of Syntonic Optometry on October 11, 1936.
