

PROGRESSIVE MYOPIA

CASE HISTORY: Female, age 19 had been fit three successive Years with minus of increasing power, was Wearing -3.75.

DESCRIPTION: S/F large for her age, good health, mentally Somewhat slow.
Could not give 20/20 even with -3.75

SYNTONIZATION: 17 treatments. Daily except Sunday.
 $\mu\upsilon / \alpha\omega$ 1-1

Results: Now wearing -1.25 with 20/20+ vision and expect to further reduce the myopia later in the coming year. this girl was showing signs of nervousness and a dislike for the treatments so thought it best To discontinue awhile.

Submitted to the Oregon Academy of Syntonic Optometry on August 17, 1936.
