

OPACITIES

\$' 48

CASE HISTORY: Male. Age 60. Planing Mill worker
Complained of loss of vision and
difficulty in his work.

DESCRIPTION: Asthenic type. Small boned. Physical
condition fair.

VISUAL CONDITION: V. A. R. E. 20/60
L. E. 20/70

Rx. R. E. -1.00
L. E. - .75 V. A. 20/50+

SYNTONIZATION: L p u and p u with no nascentization,
with occasional N/L α 8. After ten
treatments V. A. increased to 20/30.
After first twenty treatments there seems to
have been no improvement. The opacities
have broken up some, but have not cleared
away. Treatments are still being continued
but no continued improvement is noted. 71
treatments given so far. Three times a
week.

Submitted to the Oregon Academy of Syntonic Optometry, Aug. 17, 1936.
