

Lamellar Striations and Hazy Media
by John S. Fenton, O.D. F.C.S.O.

Female, age 74. Health – Arthritis and anemia.

Mediation: Is taking some kind of vitamins.

Chief complaint – Vision is blurred; esophoria

Old lenses are 7 or 8 years old. Visual analysis revealed no possible change in her Rx to produce better acuity.

Syntonic treatment given 8 of Syntonic Rx No. 2 (μ v 20 minutes, μ 8 minutes, μ v 8 minutes)

Patient's report: Vision was clear and eyes do not water now.

Further examination showed no change in the Rx but Visual acuity is now R 20/25, L 20/30.

Ophthalmoscopic examination now revealed media as much clearer and striations very faint.

Patient to report in three months for checkup.
