

ACS presents Advanced Interactive workshops 2021

Due to popular demand after the successful 201 advance course there have been many requests to do further workshops on colour acupuncture and extraocular muscle kinesiology testing. Both our guest speakers Jaxson Wearing (Chiropractor) and Maniisha Bluntschli (Chinese Medicine) have agreed to do more advanced workshops on these topics.

The first will be kinesiology testing for extra ocular muscle weakness similar to Hess screen testing, it will provide information on the weaker and stronger extra ocular muscles and their relationship to the cervico-spinal musculature and their relationships to spatial organisation.

Followed with the colour acupuncture demonstrations of how acupuncture points located all around the eye can be stimulated to improve ocular function.

Don't miss out on a great opportunity to add new techniques to your optometric toolkit to greatly speed up your therapy!

Virtual Meeting Dates:

Available to ACS and CSO current members, who have completed Advanced 201 Syntonics Course.

Session 1: Kinesiology and Extraocular Muscle performance testing

9th November 7pm AEST (Sydney time) 1hour.

Session 2: Colour Acupuncture Workshop

23rd November 7 pm AEST (Sydney Time) 1Hour.

FEE: \$30 AU. Per workshop.
