# Books of Note

BioCentrism by Robert Lanza, M.D.: How life and Consciousness Are the Keys to Understanding the Universe. Life created the universe not the universe creating life. Biology is the ultimate science not physics.

Below The Edge of Darkness, by Edith Widder, Ph.D. Exploring life and light in the deep sea. The science of bioluminescence which explores the deepest seas where all life produces light of color and flicker with its own language. Light of different intensities, patterns, color, sources where no sunlight can reach.

Hyperpolarized Light: Fundamentals of Nanobiomedical Photonics, Koruga,D., Zepter Book, 2018 “ improve brain function by light in which photons couple with excitons by icosahedral symmetry, giving polaritons ( hyper-harmonized polarized light) “ A great overview of this field is in the New Galaxy Science Magazine , 2021, from Zepter.com

C60: hexagons and biostructure of hyper polarized light with the Bioptron and Fullerene filters:

Silica in the Syntonic glass filters as Tetrahedrons

The geometric resonance to restore and regenerate structure with energy and information

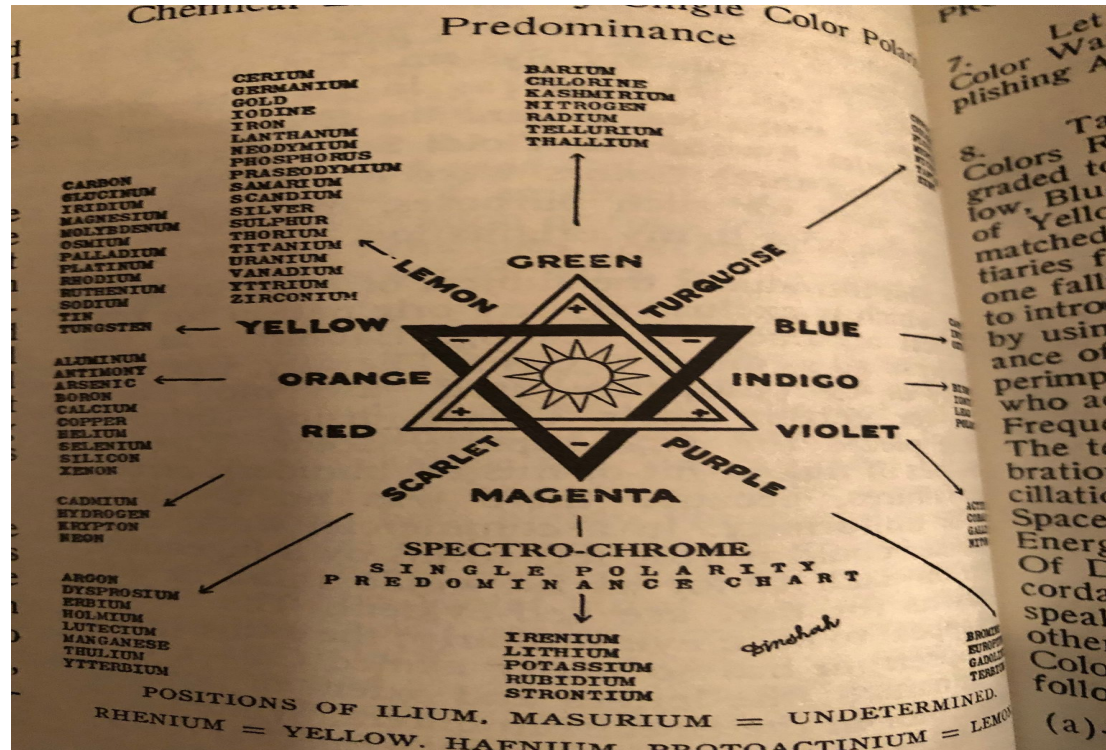

Nano structures such as microtubules, centrioles, chlatrin that can be in resonance by light through C60 fullerene filters
