Virtual CONFERENCE

Australian College of Syntonics presents
BASIC 101 SYNTONICS COURSE
Sat 24th – Sun 25th February, 2024
Virtual Zoom meeting; Sydney time Australia
(AEST)

Syntonics has been one of the most powerful adjuncts to my VT practice! I can positively say it is the single most valuable treatment I offered my learning disabilities, autistic spectrum patients as well as my TBI/ABI patients.

I am sure you will benefit tremendously from the course.

And I know most of you have heard Pilar Vergara at the recent NACBO conference talk about success in the use of Syntonics in amblyopia treatment.

(We will cover this area in the course)

The course is packed with plenty of case examples, and workshops (yes, a real workshops over the Internet).

At the end of the course you will have the confidence to diagnose and treat with Syntonics.

We will cover the basic syndromes which covers 80% of your patient's needs.

Attached is more information on the course, plus registration details.

Looking forward to seeing there!

Oh! Bring your therapist along! So they can understand what you are doing & be able better explain it to your patients when you prescribe the treatments.

BASIC 101 COURSE - By Simon Grbevski BOptom, FACBO, FCOVD, FCSO.
With James Sleeman Optom., Melanie Woodhouse Optom. Richard Shanks Optom.

You may have heard Syntonics mentioned at a number of behavioural conferences, especially those of the Neuro-Optometric Rehabilitation Association. Now you have the opportunity to learn about it and immediately implement it in your practice.

We would like to invite you to come and learn about this very powerful optometric light therapy method.

The Basic 101 Course will comprise of two days. Some of the topics covered will include history of Syntonics, light as part of the electromagnetic spectrum, light and the neurophysiology as well as colour and its influence on vision, colour field mapping. From this you can diagnose and develop treatment plans catered to the needs of the individual. More specifically we will cover:

1. Both practical education and theoretical knowledge including understanding the history of Optometric Phototherapy as well as the basic concepts
2. The anatomy and neurology of the nonvisual forming pathways

3. Optometric tests required for the diagnosis followed by the treatment protocols, as well as sample case study presentations
4. The four basic syndromes and their treatment protocols. These will provide treatment for 80% of your patients
5. How to incorporate Syntonics into your vision therapy programs and practice management
6. Ensuring you will have the information to start syntonik therapy in your practice as soon as possible
7. Presenting the latest research in a unique way
8. Photo biomodulation; the impact of light on the physiology of the body and responses that can be made
9. How Chronobiology, the study of environmental or specific lighting has profound biological effects on our patients
10. About low level laser therapy, the new medicine, its use in pain management and dry macular degeneration
11. Demonstrations, workshops and case studies on the impact of Syntonics

Over 200 optometrists have already completed this course in Australia and New Zealand. All attendees have claimed this Basic 101 Course is extremely unique and particularly interesting regardless of whether or not they have implemented Syntonics into their therapy programs.

E-BOOK copy of the Black Book will be provided to new Optometrist attendees!

ACS Conference Program

BASIC 101 COURSE

Sat 11th – Sun 12th March, 2023

Virtual Zoom meeting: Sydney time Australia (AEST)

Sat 11th March – Basic 101 Course – Day 1

9:00 – 10:00am	Emerging concepts in Neurology and photo biomodulation (History of Colour therapy)
10:15 – 10:30am	Morning coffee break
10:30 – 12:30pm	The Theory of Syntonik Phototherapy – ANS, Optometric Testing
12:30 – 1:30pm	Lunch
1:30 – 2:45pm	Alpha Omega Pupils with Lab
2:45 – 3:00pm	Afternoon coffee break

3:00 – 4:30pm Introduction to Syntonic Syndromes
4:30pm Examination

Sunday 12th March – Basic 101 Course – Day 2

9:00 – 10:30am Functional Visual Fields in Optometric Syntonic Phototherapy
10:30 – 11:00am Morning coffee break
11:00 – 12:00pm Case studies
12:00 – 1:00pm Lunch
1:00 – 2:30pm Hands on Clinic for Visual fields
2:30 – 3:00pm Afternoon coffee break
3:00 – 4:00pm Syntonics Practice Management
4:00 – 5:00pm Examination & Closing Remarks

To apply for Membership to the Australian College of Syntonics:

1. Please complete the following details.
2. Please make your payment to the college using the details at bottom of page.
3. Email both your bank payment receipt & this form to syntonicscollegeaustralia@gmail.com
4. **PayPal** is available for payments
5. Membership is only available if you complete or have previously completed the 101 Course

Membership entitles you to the following.

- Membership places you on an international directory of Syntonists
- Journal from the USA College of Syntonic Optometry
- Email newsletters
- Free Attendance to the 4 annual special Syntonics Workshops
- Membership to the USA College of Syntonic Optometry as well as Australia

- Member rates for conferences in Australia and the USA
- Access to video library of the syntonics conferences from Australia and USA
- Link to Syntonics Chat Group on completion of Basic Syntonics Course 101
- Mentor access

Registration:
